The leading national conference for patients and caregivers affected by a brain tumor diagnosis to receive information on research, treatment, survivorship and support from medical experts.

This year, the conference will be presented virtually to protect the health of our community during the COVID-19 pandemic.

Program Highlights

Emerging Advancements
Get the latest information on therapies and research across all brain tumor types.

Symptom Management
Learn treatment and care approaches to better manage brain tumor symptoms and side effects.

Meet the Experts
Get your questions answered during Q&A following sessions.

KEYNOTE SPEAKER

Maria Menounos
Emmy® Award-winning journalist, author and actress

Maria Menounos, a three-year meningioma survivor, shares lessons learned as both a caregiver for her mother, a four-year GBM survivor, and as a brain tumor patient. This dynamic keynote address will provide hope and strategies for others along the brain tumor journey.
